Parts Life; **10 000** rounds minimum
- ✓ Other; **Stainless** steel small parts,
improved low mass bolt, **long-life** springs,

Our rifles are true marvels of modern engineering - they are innovative, last exceptionally long, are highly effective and ergonomic to use.

We have no entry-level rifles - all our rifles are designed and configured for top-level shooting. Our rifles are built on the principle that all but the barrel must be as light as possible, yet durable. The barrel's life expectancy is over 20 000 rounds, which is up to two times more than on regular barrels.

UT7S-SLN7S SILENCER

Technical Details Silencer

Product Code; UT7S-SLN7S

Overall Length; 192,7 mm

Diameter; 53 mm

Weight; 669 gr.

Build Material; Stainless steel baffles and 4140 steel body

Sound; 130 dB

Color; Black

Finish; Cerakote

Flash Hider; Included M18X1

Full-Auto Rated; Full-Auto Rated

Wrench; Included
